

## RENOLIN CLP

### Heavy duty - EP - industrial gear oils of highest performance, outstanding extreme pressure characteristics and load carrying capacity

#### Description

The RENOLIN CLP products are industrial gear oils of the latest generation, having outstanding extreme pressure characteristics (EP/AW properties) and an extremely high load carrying capacity. They are industrial gear oils with excellent demulsifying properties which can be used in all types of enclosed gear drives with circulation or splash lubrication systems. The RENOLIN CLP products offer extraordinary wear protection. They surpass the requirements in the standard FZG A/8.3/90 scuffing test as well as the more severe FZG test A/16.6/140 (double velocity - 16.6 m/s - and increased starting oil sump temperature - 140 °C). The RENOLIN CLP products offer an extremely high micropitting protection (load stage "high" in the load stage test as well as the endurance test). They offer excellent wear protection for roller bearings. The wear rates in the FAG FE8 test are extremely low under these extreme test conditions (7.5 rpm, 80 °C, 80 h, 80 kN).

Latest additive technology guarantees excellent wear protection and excellent corrosion protection (steel and copper-containing materials) The RENOLIN CLP products have good elastomer compatibility, stressed static and dynamic elastomers are lubricated and protected from wear. The lifetime of the components is increased. RENOLIN CLP oils can improve equipment reliability and increase productivity.

#### Advantages / Benefits

- **Excellent corrosion protection**
- **Low foaming, excellent air release**
- **Excellent demulsifying properties (water and water-containing fluids are separated fast)**
- **High oxidation resistance**
- **Extremely high load-carrying capacity, extreme pressure-, anti-wear performance**
- **Excellent bearing wear protection (under mixed friction conditions) – FE8**
- **Excellent protection from scuffing, excellent wear protection – FZG**
- **Excellent micropitting resistance in the load stage and endurance test**
- **High Brugger wear protection**
- **Excellent elastomer compatibility (static and dynamic)**
- **Good compatibility with paint materials**
- **Flender approved according to Revision 16.1**

## RENOLIN CLP

### Heavy duty - EP - industrial gear oils of highest performance, outstanding extreme pressure characteristics and load carrying capacity

#### Application

The RENOLIN CLP oils are recommended for industrial spur-, helical- and bevel enclosed gears with circulation or splash lubrication, operating at oil temperatures up to 100 °C and peaks above (up to 120 °C). The RENOLIN CLP oils can be used for all applications where lubricants of the CLP type according to DIN 51517-3 are recommended by the gear manufacturer. These products meet and in many cases exceed the new requirements of well-known gearbox and bearing manufacturers. The RENOLIN CLP oils are particularly suited for gear sets working under heavy load or shock load. They also can be used in non-gear applications including highly loaded, low-speed plain and rolling contact bearings. These mineral oil-based products are designed to provide high quality, latest additive technology of industrial gear oil formulation. They meet the latest industrial standards of well-known OEMs.

#### Specifications

The RENOLIN CLP oils meet and in many cases exceed the requirements:

- DIN 51517-3: CLP
- ISO 6743-6 and ISO 12925-1: CKC / CKD / CKSMP
- AGMA 9005/E02: EP
- AIST 224
- David Brown S1 53.101

The products of the RENOLIN CLP series are approved for example by:

- Flender GmbH, Bocholt, Germany, Flender BA 7300, table A
- Müller Weingarten AG, Germany, DT 55 005, 10/2003
- Flender GmbH, Revision 16.1
